Statecharts

- ▶ What is a statechart?
 - ▶ Finite automaton with hierarchy and parallelism.

Statecharts

- ▶ What is a statechart?
 - ▶ Finite automaton with hierarchy and parallelism.
 - ▶ Graphically, mixture between Venn diagram and hypergraph.
- ▶ Used to model/design realtime systems.

Statecharts

- ▶ What is a statechart?
 - ▶ Finite automaton with hierarchy and parallelism.
 - ▶ Graphically, mixture between Venn diagram and hypergraph.
- ▶ Used to model/design realtime systems.
- ▶ Formal syntax and semantics

Statecharts

- ▶ What is a statechart?
 - ▶ Finite automaton with hierarchy and parallelism.
 - ▶ Graphically, mixture between Venn diagram and hypergraph.
- ▶ Used to model/design realtime systems.
- ▶ Formal syntax and semantics
- ▶ (Synchronized) Statecharts accept regular languages.

Statecharts

- ▶ What is a statechart?
 - ▶ Finite automaton with hierarchy and parallelism.
 - ▶ Graphically, mixture between Venn diagram and hypergraph.
- ▶ Used to model/design realtime systems.
- ▶ Formal syntax and semantics
- ▶ (Synchronized) Statecharts accept regular languages.
- ▶ Succinct description of regular languages

Statecharts

- ▶ Many variants for different applications:

Statecharts

- ▶ Many variants for different applications:
 - ▶ Object-orientation (ROOMcharts)

Statecharts

- ▶ Many variants for different applications:
 - ▶ Object-orientation (ROOMcharts)
 - ▶ UML and statecharts

Statecharts

- ▶ Many variants for different applications:
 - ▶ Object-orientation (ROOMcharts)
 - ▶ UML and statecharts
 - ▶ Requirements engineering

Statecharts

- ▶ Many variants for different applications:
 - ▶ Object-orientation (ROOMcharts)
 - ▶ UML and statecharts
 - ▶ Requirements engineering
 - ▶ Statecharts with temporal logic

Statecharts

- ▶ Many variants for different applications:
 - ▶ Object-orientation (ROOMcharts)
 - ▶ UML and statecharts
 - ▶ Requirements engineering
 - ▶ Statecharts with temporal logic
 - ▶ Live Sequence Charts (LSCs) – scenarios

Statecharts

- ▶ Many variants for different applications:
 - ▶ Object-orientation (ROOMcharts)
 - ▶ UML and statecharts
 - ▶ Requirements engineering
 - ▶ Statecharts with temporal logic
 - ▶ Live Sequence Charts (LSCs) – scenarios
- ▶ Statemate

- ▶ Blobs with sequence, parallel components, synchronization and hierarchy.

- ▶ Blobs with sequence, parallel components, synchronization and hierarchy.
- ▶ Example:

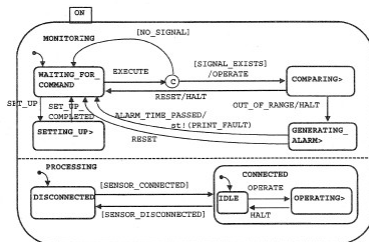

Figure 7.6 States marked as having entering and exiting reactions.

Statecharts

Homework

Homework:

- (a) Use a statechart to model an n -bit counter.
- (b) Use a statechart to model collision sequentialization in a fingerspelling hand (see VanZijl and Raitt, Afrigraph 2004).
