

Chapter 14 - Secondary Storage Structures

- Access time expensive
- Efficiency improved by scheduling operations
- FCFC: Fair, but can be expensive
- SSTF: Possibility of starvation
- SCAN: Moves disk heads from side to side
- C-SCAN: Retracts head and sweeps from same direction
- LOOK: variation on SCAN
- Evaluation

Chapter 14 - Management

- Low-level and logical formatting
- Boot block
- Error handling: sparing and slipping
- Swapping: Either use logical file system or separate disk
- Reliability: RAID
